

## 2020 Pricing

**At Navocean we offer our Nav2 Sail and Solar ASV for ocean and freshwater data collection. We offer full Nav2 ASV mission operations, data collection, and sensor integration services tailored to customer specific needs. Our goal is to offer services affordable to the science and research community. For customers preferring to own and operate their own equipment we offer Nav2 ASVs for sale:**

### **Nav2 ASV Mission Operations Service:**

**Our standard base rate for Nav2 mission operations is \$1000/Day/Vehicle (24 hr day), for the first 10 days. For each additional day beyond 10 we charge a base rate of \$500/Day/Vehicle (24 hr day). Our base rate is modified according to project specific logistical requirements, plus travel and shipping as needed. Projects of larger scale may achieve further cost efficiency. In addition to our standard navigation and meteorological sensors, we offer a variety of sensor options and sensor integration services.**

### **Nav2 ASV for sale:**

**The base price for a Nav2 ASV including the standard Navigation sensor package is \$75,000, we offer a variety of additional sensor options and custom sensor integration services.**
